Full-Stack Web Developer

PROFESSIONAL SUMMARY

Detail-oriented BSIT graduate with hands-on experience in web development through freelancing and internship. Developed applications including an AI-driven survey system, e-commerce platform, and QR-based inventory system, with skills in API integration and Docker-based deployment.

PROFESSIONAL EXPERIENCE

Freelance Web Developer

Self-employed (2024 - Present)

- Developed and deployed capstone projects, including an AI-driven survey system, e-commerce platform, and QR-based inventory system, improving data accessibility and efficiency .
- Built and deployed applications using PHP, Laravel, JavaScript, VueJS, and MySQL, with Docker, Git/GitHub, and cloud platforms (Contabo VPS).
- Collaborated with clients and faculty to gather requirements and deliver user-focused solutions .

Web Developer/IT Staff (Intern)

G-Hoven IT Solutions Butuan City (August 2025 - December 2025)

- Developed and deployed a visitor log system that improved data accessibility by enabling real-time access from any location.
- Assisted in the installation and configuration of biometric attendance systems for government agencies.

PROJECTS

CSU AI-Driven SmartSurvey System | <https://survey-net.online>

Laravel | Vue.js | Flask | MySQL | Chart.js | Mapbox API | Docker | Nginx

- Developed a web-based survey system with sentiment analysis and decision support features to enhance client feedback evaluation .
- Fine-tuned a pre-trained XLM-RoBERTa model to classify multilingual client comments (Bisaya, Tagalog, English) .
- Integrated a Flask-based ML API with a Laravel backend for real-time sentiment analysis .
- Implemented data visualization and map features using Chart.js and Mapbox API for improved insights and navigation .
- Deployed the system on a Contabo VPS using Docker and Nginx, with GitHub Actions for CI/CD .

Marketplace for Handmade Products | github.com/aurjohnmonte/Marketplace_Project

PHP | Laravel | Vue.js | JavaScript | MySQL | Mapbox API

- Developed a web-based e-commerce platform for browsing and purchasing handmade products in Butuan City.
- Implemented map and navigation features using Mapbox API to help users locate shops in real time .
- Designed and built core features including product listings, ordering system, and cash-on-delivery payment option .
- Collaborated with a front-end developer and client to gather requirements and deliver a user-focused system .

QR-Based Inventory Monitoring System | github.com/aurjohnmonte/Inventory_Monitoring_QRCODE

PHP | Laravel | JavaScript | Vue.js | MySQL

- Developed a web-based inventory monitoring system using QR codes for efficient tracking of materials and assets in CSU campus.
- Implemented role-based access control to separate responsibilities and improve system security
- Designed and built core features, including search and filtering, category grouping, quantity management, and real-time tracking of item status and location
- Applied object-oriented programming (OOP) principles to ensure maintainable and scalable code
- Collaborated with the client to gather requirements and deliver a user-focused solution

SKILLS

Technical Skills

- HTML, CSS, JavaScript, PHP
- Laravel, Vue.js, TailwindCSS
- MySQL
- Docker, Nginx, Git, Github Actions
- Cloud Services (AWS, Contabo VPS)
- Basic Linux Commands
